The electronic copy of this document (the “Copy”) has been delivered for the convenience and use of the recipient. The recipient accepts full responsibility for verifying the accuracy and completeness of the data and information in the Copy, and acknowledges that it is a working, but not definitive copy of this document.

The original hard copy of this document, signed by an authorized officer of Malroz (the “Original”), delivered and used in accordance with the terms of the applicable proposal or engagement contract entered into by Malroz for its preparation (the “Contract”), contains the only definitive terms, data and information on which reliance may be made. Malroz accepts no responsibility for and will have no liability arising from any use of or reliance on any data or information contained in the Copy. The delivery of the Copy to the recipient does not give the recipient or any other party any rights of use or reliance that are not expressly set out in the Contract.

The recipient agrees to defend, indemnify and hold Malroz harmless of and from any losses, claims, actions, liabilities, costs and expenses (including legal fees on a solicitor and his own client basis) arising in connection with the use or reliance on data or information contained in the Copy by any party not entitled to do so under the terms of the Contract.

The recipient of the Copy is prohibited from redistributing it, and from using any design or drawing information contained within it, in whole or in part, for any purpose other than that expressly permitted in the Contract, without the express prior written consent from Malroz, signed by an authorized officer of Malroz.

Subject: 2021 Annual Inspection Report
La Rue Mills Landfill (A447102)

Dear Mr. Holliday and Mr. Tuck:

Malroz Engineering Inc. (Malroz) was retained by the Township of Leeds and the Thousand Islands (TLTI) to conduct semi-annual inspections at the La Rue Mills closed landfill (the Site). Inspections were conducted to satisfy condition outlined in the MECP inspection report dated May 14th, 2015.

Inspections were conducted on May 19 and October 7, 2021 by Malroz staff under the supervision of a qualified person and in the absence of snow. Results of the inspections identified the following (attached):

- Site drainage was effective and ponded water was not observed at the site.
- The landfill cap appeared in good condition and waste was not exposed.
- Leachate seeps were not observed along the adjacent surface water body.
- Fencing was in good condition where present.
- The site was secure with no evidence of dumping.
- Vermin and litter were not observed.
- Monitoring wells present at the site appeared to be in good condition.

We recommend continuation of the biannual inspection program. We recommend that the monitoring wells located at the site be abandoned in accordance with O. Reg. 903/90, as they are no longer in use.
