Subject: re: site plan d14-2022-008

I REcieved a letter in the mail re: site plan d14-2022-008
proposed zoning amandment from RU to RU-XX
upon viewing proposal

1) The proposed complex is an industrial complex.. not a small commercial venture..
this type of operation should be in an industrial park.

2)constraints put into place by Cataeaqui water conservation render the whole usable lot at approx 10% of
available land area..
this is not an efficiant use of the land and not the 90% efficiancy it has as for agricultural use

3) due to the negative visual and envnviromental aspect of this buisness..
it may have a negative impact to the tourist area that this thousand islands has ,which is unique in canada
and the world..
there is some responibilty here which is associated with this location
being canada's "front door step"

many thanks for your consideration
