Township Leeds and the Thousand Islands

Nov 18, 2022

Chief Planner Tom Fehr,

Mr. Fehr,

I would like to formally apply to Our Township for some permits for upgrades and alterations to our marine facility, Point Comfort (818769 On. Inc.) a wholly owned subsidiary of Glen House Resort.

We would like to complete these alterations before spring but would like to know if our proposal is reasonable as we are currently marketing and accepting payment for these slips next season.

It would replace some of our damaged docking from recent flooding making them safe again for our returning American Local seasonal dockers.

These docks would be an extension to existing floating docks already cat walked through the environmental zone away from the shoreline.

I have already contacted C.R.C.A. to try to arrange to see what I need to display to them to gain their permission but haven't heard back.

I am only asking for your comments and suggestions to pass on to Eastern Engineering so they can incorporate this into to a plan I have asked them to make.

The information supplied is to help you familiarize Council with this application and hopefully indicate some direction to reduce duplication and timing.

I Remain Yours Truly,

David Seal,

Glen House Resort
